

Romaine Lettuce Advisory

Romaine Lettuce Advisory

Both the CDC and FDA have advised consumers not to eat romaine lettuce grown in California's Salinas Valley, which includes Santa Cruz, San Benito, Monterey and Santa Clara Counties. They are also asking retailers not to sell this product. As of November 22, 2019, WinCo Foods removed all romaine lettuce grown in the Salinas Valley, and salad mixes that contain romaine, from our Stores.

All romaine lettuce currently available at WinCo Foods is from regions not affected by this advisory.
